Pike's View
Ceresville
Private

Circa 1860
Samuel Hoke

Pike's View, a two story, square shaped, common bond brick structure, was built by Samuel Hoke in the 1860's. The land on which the house is situated is part of the tract of land called Ceresville, including approximately four hundred and eight acres. Samuel Hoke was a prominent Frederick County resident. The owner of a large amount of land in the Ceresville - Mount Pleasant area, Hoke was credited with introducing the lime burning method for agricultural use.

The principal facade of the structure is three bays wide. The main entrance is located in the second bay. It consists of a recessed panelled doorway with a wooden panelled door with architrave moulding and two arched panels over two square panels. The door is framed by blue stained four light side lights and crowned by a blue stained three light transom with corner lights. Occupying the remaining bays are original 2/2 windows framed by wooden louvered shutters and crowned by quarried stone lintels and stone sashes.

A three bay entrance porch spans the facade. A dentil cornice with return lies below the slate fishscale pattern roof. Two chimneys rise from the structure. The structure rests upon a stone rubble foundation. The significant rear outbuildings complete the setting of this beautifully proportioned and symmetrical structure.

DESCRIBE THE PRESENT AND ORIGINAL (IF KNOWN) PHYSICAL APPEARANCE

Pike's View, a two and a half story common bond brick structure, is situated on the west side of the Woodsboro and Frederick Turnpike facing east.

The principal facade is three bays wide. The main entrance is located in the second bay. It consists of a recessed panelled doorway with a wooden panelled door with two arched panels over two square panels framed by architrave mouldings. The door is crowned by a three light transom with corner lights and framed by four light side lights. The transom and side lights are all filled with blue stained glass. The door features all original hardware. Above the door is a single stone lintel. Occupying the remaining bays are original 2/2 windows framed by original wooden louvered shutters. A unique feature of the house are the quarried stone lintels and window sashes that appear to be made of wood. The stone was quarried from a local stone quarry.

A three bay entrance porch spans the facade of the structure. It is supported by four Doric columns and two Doric colonnades. The porch is covered by a standing seam tin roof. Beneath the roofline is a plain boxed cornice.

To the rear of the structure is a two bay closed porch covered by novelty siding. The rear entrance consists of a recessed panelled doorway in which is set a wooden door with three light transom. A boxed cornice lies below the roofline and continues on the north and south sides of the structure.

The structure is covered by a slate roof in a fishscale pattern. Below the roof on the facade is a dentil cornice with return. Two chimneys rise from the structure, one from the north and one from the south gable end. The entire structure rests upon a stone rubble foundation.

A number of interesting outbuildings are found on the grounds of the house. To the north of the structure is a wooden wagon shed with corncribs on either side of the storage area. To the rear of the structure there are two outbuildings of interest, one constructed of brick and one constructed of stone. Both feature original strap hinges and are covered by standing seam tin roofs.

STATEMENT OF SIGNIFICANCE

Pike's View, a two story square shaped common bond structure, was built by Samuel Hoke, Sr. in the 1860's. The land on which the house is situated is part of the original tract named Ceresville, incorporating nearly four hundred and eighty acres, and purchased by Samuel Hoke, Sr. in 1856.¹ The acreage included in the present deed and through the ensuing years, includes an island purchased by Samuel Hoke, Sr. from E. H. Rockwell in 1866.² The island, named Sycamore Island, is located in the center of the Monocacy River which flows at the edge of the Hoke boundary lines.

Samuel Hoke was a prominent citizen of Frederick County. He was the owner of a large amount of property in the Ceresville - Mount Pleasant area. He is credited with having introduced the method of lime burning for agricultural reasons in Frederick County.³ The house remained in the Hoke family until 1926.⁴ It is now owned by Clayton H. Zimmerman.

Pike's View, taking its name from the Woodsboro and Frederick Turnpike, is a significant structure in the Ceresville area. The quarried stone lintels and sashes are a unique addition to the house. The residence is virtually unchanged from the time it was built. The numerous outbuildings are in the same unchanged state. Two outbuildings to the rear of the structure are of particular interest. One is constructed of brick and one of stone. They both feature strap hinges and original standing seam tin roofs.
